* Calculated using the prevailing three-month gilt (UK government bond) yield.

Investment risks: An investment cannot be made directly in an index. Unlike money deposited in a bank or building society account, an investment involves stock market risk. This means that the value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Important information: This is marketing material and not financial advice. It is not intended as a recommendation to buy or sell any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/ investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication.
