General Information

Invesco Markets II plc (the "Company") is an open-ended variable capital company with segregated liability between Funds of the Company (each a "Fund" and collectively the "Funds"). The Company was incorporated on 11 September 2015. It is organised under the laws of Republic of Ireland as a public limited company pursuant to the Companies Act 2014 (as amended) and as an undertaking for collective investment in transferable securities pursuant to the European Communities ("Undertakings for Collective Investment in Transferable Securities") Regulations 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities Regulations 2019 (the "Central Bank UCITS Regulations").

The Company is structured as an umbrella investment company and comprises separate Funds which may be established from time to time by the Directors with the prior approval of the Central Bank of Ireland (the "Central Bank").

A Fund is defined as a separate portfolio of assets which is invested in accordance with the investment objective and policies set out in the relevant Supplement and to which all liabilities, income and expenditure attributable or allocated to such portfolio shall be applied and charged.

The particulars of each Fund are set out in a separate Supplement. Any such Supplement lists all of the existing Funds. Redeemable Shares/Shares (these terms are used interchangeably throughout the Financial Statements) of more than one Class may be issued in relation to a Fund. Information contained within the Supplements is selective and should be read in conjunction with the Prospectus. On the introduction of any new Class of Shares, the Company prepares and the Directors will issue documentation setting out the relevant details of each such Class of Shares. A separate portfolio of assets is maintained for each Fund and investments are made in accordance with the investment objective applicable to each Fund.

There are 52 active Funds in existence as at 30 June 2022.

Investment Objectives and Policies

The Constitution provides that the investment objective and policies for each Fund will be formulated by the Directors at the time of the creation of the Fund. Each Fund will be either passively or actively managed.

The investment objective of passively managed Funds will be to seek to provide the Shareholder with a Target Performance linked to the performance of a Reference Index or Reference Asset by directly or indirectly purchasing a portfolio of Transferable Securities that may (but is not obliged to) comprise all or a representative sample of the constituent securities of that Reference Index or Reference Asset. There is no assurance that the investment objective of any such Fund whose performance is linked to the Reference Index or Reference Asset will actually be achieved. The investment objective of actively managed Funds will not be to track the performance of a Reference Index or Reference Asset; instead, the Investment Manager will apply investment techniques and risk analysis on a discretionary basis when making investment decisions for such Funds with a view to delivering a long-term return. Whether a Fund is actively or passively managed will be disclosed in the relevant Supplement.

The assets of each Fund will be invested in accordance with the investment restrictions contained in the Regulations, which are summarised in the "Investment Restrictions and Permitted Investments" section and such additional investment restrictions, if any, as may be adopted by the Directors for any Fund and specified in the relevant Supplement.

Generally, each passively managed Fund will seek to achieve its objective by pursuing a policy which seeks to track the performance of a Reference Index or Reference Asset and will generally use either a Replication Strategy, Sampling Strategy or Master Feeder Strategy (as described below and defined in the relevant Supplement) with the aim of minimising as far as possible the difference in performance between such Fund and the relevant Reference Index or Reference Asset. The Investment Manager will determine whether a Replication Strategy, Sampling Strategy or Master Feeder Strategy is most appropriate for a Fund. The relevant Supplement will specify and describe the strategy the applicable Fund intends to use.

The following is a summary description of each of the Replication Strategy, Sampling Strategy and Master Feeder Strategy. More detailed information on each strategy is set forth in the Supplement for the relevant Fund, as appropriate.

- **Replication Strategy** - this strategy seeks to hold all of the securities of a particular Reference Index or Reference Asset, with the approximate weightings of that Reference Index or Reference Asset, so that the portfolio of such Fund is a near mirror-image of the components of the relevant Reference Index or Reference Asset.
- **Sampling Strategy** - this strategy seeks to build a representative portfolio that provides a return comparable to that of a Reference Index or Reference Asset. This strategy is used for tracking certain equity or fixed income indices which are too broad to replicate (i.e. the Reference Index or Reference Asset contains too many securities for the Fund to be able to purchase them all efficiently) contain securities which are currently unavailable or difficult to purchase in the open markets or an announcement has been made that certain securities will shortly be included as components of the Reference Index or Reference Asset. Consequently, a Fund using this strategy will typically hold only a subset of the securities which comprise the relevant Reference Index or Reference Asset.
- **Master Feeder Strategy** - this strategy seeks to achieve the investment objective of the relevant Fund by investing substantially all (and in any event no less than 85%) of the assets of the relevant Fund in another eligible UCITS CIS in accordance with the requirements of the Central Bank.

A passively managed Fund may also on occasion hold securities which are not comprised in the relevant Reference Index or Reference Asset where the Investment Manager believes this to be appropriate in light of the investment objective and investment restrictions of the Fund, or other factors such as market conditions. The potential for any such proposed investment by a Fund will be disclosed in the relevant Supplement.

In limited circumstances and only where disclosed in the Supplement for the relevant Fund, a passively managed Fund may also use the Swap Strategy (as described below and defined in the Supplement for the relevant Fund).

- **Swap Strategy** - this strategy uses financial derivative instruments and transactions and/or OTC derivatives to achieve the Target Performance by exchanging the performance of a basket of global equity securities and equity related securities in return for the performance/return of the Reference Index.

In each case, information in relation to the types of instruments or securities in which the relevant Fund will invest, including details in relation to the exchanges or markets on which the Fund's investments will be listed or traded, will be set out in the Supplement for the relevant Fund.

There is no assurance that the investment objective of any Fund whose performance is linked to the Reference Index or Reference Asset will actually be achieved.

The individual Fund's investment objectives and policies are detailed on pages 13 to 28.

As at 30 June 2022, the Company had 52 active Funds.

Investment Objectives and Policies (continued)

Invesco Preferred Shares UCITS ETF

The investment objective of the Invesco Preferred Shares UCITS ETF (the "Fund") is to achieve the performance of the ICE BofA Diversified Core Plus Fixed Rate Preferred Securities Net Total Return Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances, for example, market dominance. Market dominance exists where a particular component of the Reference Index has a dominant position in the particular market sector or geographical region in which it operates and as a result accounts for a large proportion of the Reference Index. This means that the Fund may have a high concentration of investment in a particular issuer.

Invesco US IG Corporate Bond ESG UCITS ETF (formerly Invesco USD Corporate Bond UCITS ETF)

The investment objective of the Invesco US IG Corporate Bond ESG UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg MSCI USD Liquid Corporate ESG Weighted Bond Index (the "Reference Index"), less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy ("Sampling Strategy"), which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk, return and ESG characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank. The Fund may also engage in transactions in FDIs for hedging and/or efficient portfolio management purposes. The Fund may use the following FDIs listed on a Market or traded OTC, as applicable: options and futures transactions, forward contracts, non-deliverable forwards, spot foreign exchange transactions and contracts for difference. The Fund shall not invest more than 10% of its net assets in other UCITS or other open or closed ended CIS.

Invesco EUR IG Corporate Bond ESG UCITS ETF (formerly Invesco Euro Corporate Bond UCITS ETF)

The investment objective of the Invesco Euro Corporate Bond UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg MSCI Euro Liquid Corporate ESG Weighted Bond Index (the "Reference Index"), less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy ("Sampling Strategy"), which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality.

Quality: Securities must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality.

EUR 500mn minimum par amount outstanding.

Invesco EUR Corporate Bond ESG Multi-Factor UCITS ETF

The Investment objective of the Invesco Euro Corporate Bond ESG Multi-Factor UCITS ETF (the "Fund") is to seek total return by investing in an actively managed portfolio of corporate bonds that meets certain environmental, social, and corporate governance ("ESG") criteria.

In order to achieve its investment objective, the Fund will generally invest in a portfolio of fixed rate euro denominated unsecured corporate bonds from global issuers with an investment grade credit rating.

Securities are selected by the Investment Manager based on two criteria:

- compliance with the Fund's ESG policy (the "ESG Policy");
- attractiveness determined in accordance with the Investment Manager's quantitative investment model.

Invesco EUR Corporate Bond ESG Short Duration Multi-Factor UCITS ETF

The Investment objective of the Invesco Euro Corporate Hybrid Bond ESG Short Duration Multi-Factor UCITS ETF (the "Fund") is to seek total return by investing in an actively managed portfolio of corporate bonds that meets certain environmental, social, and corporate governance ("ESG") criteria.

In order to achieve its investment objective, the Fund will generally invest in a portfolio of fixed rate euro denominated unsecured corporate bonds from global issuers with an investment grade credit rating, and less than or equal to 5 years until maturity.

Securities are selected by the Investment Manager based on two criteria:

- compliance with the Fund's ESG policy (the "ESG Policy");
- attractiveness determined in accordance with the Investment Manager's quantitative investment model.

Investment Objectives and Policies (continued)

Invesco Euro Corporate Hybrid Bond UCITS ETF

The investment objective of the Invesco Euro Corporate Hybrid Bond UCITS ETF (the "Fund") is to achieve the total return performance of Bloomberg Euro Universal Corporate ex Financials Hybrid Capital Securities 8% Capped Bond Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index, by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. The Fund may invest up to 20% of its Net Asset Value in securities issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances. This means that the Fund may have a high concentration of investment in a particular issuer.

The Reference Index is designed to reflect the performance of EUR-denominated, fixed rate, investment-grade and high yield corporate and government related debt securities whilst including only fixed-to-float hybrid capital securities from industrial and utilities sectors.

EUR 500mn minimum par amount outstanding.

Invesco GBP Corporate Bond ESG UCITS ETF

The investment objective of the Invesco GBP Corporate Bond ESG UCITS ETF (the "Fund") is to achieve the total return performance of the Bloomberg MSCI Sterling Liquid Corporate ESG Weighted Bond Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy ("Sampling Strategy"), which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" of the Prospectus. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to reflect the performance of sterling-denominated investment grade, fixed-rate, taxable securities issued by corporate issuers adjusted based upon certain environmental, social and governance ("ESG") metrics, which seek to increase overall exposure to those issuers demonstrating a robust ESG profile. The Index includes publicly issued securities by industrial, utility and financial institution issuers. The securities which comprise the Reference Index must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality. In addition, bonds must have GBP 350 million minimum par amount outstanding, fixed-rate coupon issues and at least one year to final maturity regardless of optionality.

Invesco GBP Corporate Bond UCITS ETF

The investment objective of the Invesco GBP Corporate Bond UCITS ETF (the "Fund") is to achieve the total return performance of the Bloomberg Sterling Liquid Corporate Bond Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy ("Sampling Strategy"), which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality. Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" of the Prospectus.

The Reference Index is designed to reflect the performance of GBP-denominated investment grade, fixed-rate, taxable securities issued by corporate issuers. The index includes publicly issued securities by industrial, utility and financial institution issuers.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Investment Objectives and Policies (continued)

Invesco Emerging Markets USD Bond UCITS ETF

The investment objective of the Invesco Emerging Markets USD Bond UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg Emerging Markets USD Sovereign Index (the "Reference Index"), less fees, expenses and transaction costs.

The Reference Index is designed to measure fixed and floating-rate US dollar-denominated debt issued by Emerging Markets governments. In tracking the Reference Index, the Investment Manager applies the Sampling Strategy, which includes the use of quantitative analysis, to select securities from the Reference Index. The Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. Country eligibility and classification as Emerging Markets is rules-based and reviewed annually using World Bank income group and International Monetary Fund (IMF) country classifications. The EM USD Sovereign Index is a subset of the flagship EM USD Aggregate Index. Country capped versions of the EM USD Sovereign Index are also available.

Currency: Principal and coupon must be denominated in USD.

Sector: Sovereign issues only

Amount outstanding: At the security level, USD 500mn minimum par amount outstanding.

Country inclusion: Bloomberg uses a fixed list of emerging market countries that is reviewed annually to define country eligibility in dedicated emerging markets hard currency, local currency, and inflation-linked benchmarks. Criteria for inclusion in the emerging markets country list are rules-based and include:

- Countries that meet one of the following two criteria: World Bank Income group classifications of low/middle income or International Monetary Fund (IMF) classification as a non-advanced country.
- Additional countries that bond investors classify as emerging market due to factors such as investability concerns, the presence of capital controls, and/or geographic considerations may also be included on the list and are also reviewed on an annual basis. As of April 2013, four additional markets are included in the Bloomberg EM country list: Czech Republic, Israel, South Korea, and Taiwan.

Issue rating: Investment grade, high yield and unrated securities are permitted. Unrated bonds may use an implied issuer rating when not rated by a credit rating agency (Moody's, S&P, and Fitch).

Invesco AT1 Capital Bond UCITS ETF

The investment objective of the Invesco AT1 Capital Bond UCITS ETF (the "Fund") is to achieve the performance of the iBoxx USD Contingent Convertible Liquid Developed Market AT1 (8/5% Issuer Cap) Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index, by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. The Fund may invest up to 20% of its Net Asset Value in securities issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to reflect the total return performance of USD-denominated contingent convertible bonds issued by banks from developed countries worldwide.

The securities which comprise the Reference Index must be rated by at least one of the three credit rating agencies, Moody's, S&P or Fitch, but there is no minimum rating requirement.

To be included in the Reference Index, securities must have a minimum par amount outstanding of USD 750mn and the issuers must have a minimum notional outstanding of 1bn in their local currency.

Invesco Variable Rate Preferred Shares UCITS ETF

The investment objective of the Invesco Variable Rate Preferred Shares UCITS ETF (the "Fund") is to achieve the net total return performance of the ICE Diversified Variable Rate Preferred & Hybrid Securities Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index, by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. The Fund may invest up to 20% of its Net Asset Value in securities issued by the same body. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to track the performance of floating and variable rate investment grade and sub-investment grade U.S. dollar denominated preferred and hybrid securities publicly issued by corporations in the U.S. domestic market.

In order to be included in the Reference Index, qualifying securities must: (i) be publicly issued; (ii) be U.S. registered or exempt from registration; (iii) have at least one day remaining to maturity and at least 18 months to final maturity at the date of issuance; (iv) issued in either \$25 or \$1,000 par increments; and (v) have a floating rate coupon or dividend. Fixed-to-floating rate securities are included in the Reference Index while in their fixed-rate period.

Qualifying securities that are listed on the NYSE or NASDAQ exchanges, and that have average monthly consolidated trading volume over the last six months of at least 100,000 shares, must have at least \$100 million face amount outstanding. Any partial month's trading volume data resulting from a new security at point of issue will be adjusted by multiplying the total number of trading days in the month by the average daily trading volume for the partial period. All other qualifying securities must have at least \$350 million face amount outstanding.

Investment Objectives and Policies (continued)

Invesco US Treasury Bond UCITS ETF

The investment objective of the Invesco US Treasury Bond UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg US Treasury Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy. In tracking the Reference Index, the Investment Manager applies the Sampling Strategy which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration, industry sectors and credit quality.

The Reference Index measures total return performance of US dollar-denominated, fixed-rate, nominal debt issued by the US Treasury.

To be eligible for inclusion in the Reference Index, eligible securities' principal and interest must be denominated in USD. The securities which comprise the Reference Index must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality. Local currency treasury issues are classified using the middle issuer level rating from each agency for all outstanding bonds, even if bond level ratings are available.

To be eligible for inclusion in the Reference Index, bonds must have USD 300mn minimum par amount outstanding.

Invesco US Treasury Bond 0-1 Year UCITS ETF

The investment objective of the Invesco US Treasury 0-1 Year UCITS ETF (the "Fund") is to achieve the total return performance of the Bloomberg US Treasury Coupons Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy ("Sampling Strategy"). In tracking the Reference Index, the Investment Manager applies the Sampling Strategy which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration, industry sectors and credit quality.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" of the Prospectus.

The Reference Index measures the total return performance of US dollar-denominated, fixed-rate, nominal debt issued by the US Treasury. To be included in the index, securities must have at least one and up to, but not including, 12 months to maturity.

To be eligible for inclusion in the Reference Index, eligible securities' principal and interest must be denominated in USD. The securities which comprise the Reference Index must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality. Local currency treasury issues are classified using the middle issuer level rating from each agency for all outstanding bonds, even if bond level ratings are available.

Invesco US Treasury Bond 1-3 Year UCITS ETF

The investment objective of the Invesco US Treasury Bond 1-3 Year UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg US Treasury 1-3 Year Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy. In tracking the Reference Index, the Investment Manager applies the Sampling Strategy which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration, industry sectors and credit quality.

The Reference Index measures the total return performance of US dollar denominated, fixed-rate, nominal debt issued by the US Treasury. To be included in the Reference Index, securities must have at least one and up to, but not including, three years to maturity.

To be eligible for inclusion in the Reference Index, eligible securities' principal and interest must be denominated in EUR. The securities which comprise the Reference Index must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality. Local currency treasury issues are classified using the middle issuer level rating from each agency for all outstanding bonds, even if bond level ratings are available.

To be eligible for inclusion in the Reference Index, bonds must have EUR 300mn minimum par amount outstanding.

Invesco US Treasury Bond 3-7 Year UCITS ETF

The investment objective of the Invesco US Treasury Bond 3-7 Year UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg US Treasury 3-7 Year Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy. In tracking the Reference Index, the Investment Manager applies the Sampling Strategy which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration, industry sectors and credit quality.

The Reference Index measures the total return performance of US dollar denominated, fixed-rate, nominal debt issued by the US Treasury. To be included in the Reference Index, securities must have between 3 and 7 years remaining to maturity.

To be eligible for inclusion in the Reference Index, eligible securities' principal and interest must be denominated in USD. The securities which comprise the Reference Index must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality. Local currency treasury issues are classified using the middle issuer level rating from each agency for all outstanding bonds, even if bond level ratings are available.

Investment Objectives and Policies (continued)

Invesco US Treasury Bond 3-7 Year UCITS ETF (continued)

To be eligible for inclusion in the Reference Index, bonds must have USD 300mn minimum par amount outstanding.

Invesco US Treasury Bond 7-10 Year UCITS ETF

The investment objective of the Invesco US Treasury Bond 7-10 Year UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg US Treasury 7-10 Year Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy. In tracking the Reference Index, the Investment Manager applies the Sampling Strategy which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration, industry sectors and credit quality.

The Reference Index measures the total return performance of US dollar-denominated, fixed-rate, nominal debt issued by the US Treasury. To be included in the Reference Index, securities must have between 7 and 10 years remaining to maturity.

To be eligible for inclusion in the Reference Index, eligible securities' principal and interest must be denominated in USD. The securities which comprise the Reference Index must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality. Local currency treasury issues are classified using the middle issuer level rating from each agency for all outstanding bonds, even if bond level ratings are available.

To be eligible for inclusion in the Reference Index, bonds must have USD 300mn minimum par amount outstanding.

Invesco MSCI Europe ESG Leaders Catholic Principles UCITS ETF

The investment objective of the Invesco MSCI Europe ESG Leaders Catholic Principles UCITS ETF (the "Fund") is to achieve the performance of the MSCI Europe Select Catholic Principles ESG Leaders 10/40 Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index, by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is a free float-adjusted market capitalisation index designed to represent the net total return performance of companies with high environmental, social and governance ("ESG") ratings relative to sector peers.

The Reference Index comprises of securities in the form of equities and is constructed from the MSCI Europe Index (the "Parent Index"). At each annual index review, the composition of the index is reassessed in order to target 50% free float-adjusted cumulative market capitalisation of each sector of the Parent Index. The Reference Index aims to target sector weights that reflect the relative sector weights of the Parent Index to limit the systematic risk introduced by the ESG selection process. The Reference Index uses company ratings and research provided by MSCI ESG Research LLC. In particular, the Reference Index uses the following three MSCI ESG research products: MSCI ESG Ratings, MSCI ESG Controversies and MSCI Business Involvement Screening Research.

Existing constituents of the Reference Index are required to have an MSCI ESG rating score above B and a MSCI ESG controversies score above 0 to remain in the Reference Index, while companies that are currently not constituents of the Reference Index are required to have an MSCI ESG rating score above BB and an MSCI ESG controversies score above 3 to be considered eligible for inclusion in the Reference Index.

The Reference Index excludes companies showing involvement in the following activities: controversial weapons, civilian firearms, nuclear weapons, tobacco, alcohol, gambling, genetically modified organisms, nuclear power, and thermal coal.

The Reference Index also excludes companies that are considered to be not in accordance with Catholic principles as evaluated based on their involvement in the following activities: stem cells, adult entertainment, conventional weapons, abortion, contraceptives, animal testing and failing to comply with the United Nations guiding principles for business and human rights.

The remaining securities in the Reference Index are weighted in proportion to their free float-adjusted market capitalisation.

The MSCI 10/40 Index's methodology is applied to the remaining securities such that the weight of any single group entity is capped at 10% and the sum of the weights of all group entities with a weight of more than 5% is capped at a maximum of 40%.

Invesco MDAX® UCITS ETF

The investment objective of the Invesco MDAX® UCITS ETF (the "Fund") is to achieve the performance of the MDAX® Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index, by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is comprised of and measures the net total return of 60 medium-sized German public limited companies and measures the net total return performance from all industries that rank directly below the 30 large-sized companies (based on market capitalisation and order book turnover) which comprise the DAX®. The Reference Index is weighted by free-float market capitalisation, with no company being allowed to account for more than 10 per cent of the Reference Index. Foreign companies primarily active in Germany may also be included in the index.

To be eligible for inclusion in the Reference Index companies must have (i) an existing listing in the prime standard segment of the Deutsche Börse AG, Frankfurter Wertpapierbörse, (ii) continuous trading on Xetra®, the trading venue operated by the Deutsche Börse AG, Frankfurter Wertpapierbörse, (iii) a minimum free float of 10%, and (iv) legal headquarters or operating headquarters in Germany.

For foreign companies to be included in the Reference Index such foreign companies must (i) have a registered office in or operating headquarters in Germany, or (ii) have their focus of trading volume on Xetra® (such companies must have at least 33% of total turnover within the EU over the last 12 months) and their legal headquarters in an EU or EFTA country.

Investment Objectives and Policies (continued)

Invesco CoinShares Global Blockchain UCITS ETF

The investment objective of the Invesco CoinShares Global Blockchain UCITS ETF (the "Fund") is to achieve the performance of the CoinShares Blockchain Global Equity Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index, by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index tracks the net total return performance of companies within the index universe who participate in the Blockchain ecosystem.

The index universe is comprised of 26 global markets, from which companies are screened for participation in activities including:

- (a) Mining hardware - companies involved in the manufacture, distribution or assembly of cryptocurrency mining equipment or related components;
- (b) Mining technology - the development of software or techniques used in mining equipment production of the crypto-currency mining process;
- (c) Mining operations - the development of software or techniques used in mining equipment production of the crypto-currency mining process;
- (d) Energy - the ownership or control of energy assets with characteristics suitable for cryptocurrency mining;
- (e) Token investments - companies who hold cryptocurrency related tokens or who have some rights to cryptocurrency tokens or similar instruments such as an investment fund, ETF or derivative contract, which has some link to cryptocurrency-assets;
- (f) Blockchain financial services - companies offering or developing trading, investment, consulting or other blockchain related financial services;
- (g) Blockchain payment systems - operation or development of payments systems which involve blockchain technology;
- (h) Blockchain technology solutions - development or operation of commercial technological solutions related to blockchain; and
- (i) Blockchain consulting or communications services - advising or consulting on blockchain related technologies.

Invesco UK Gilt 1-5 Year UCITS ETF

The investment objective of the Invesco UK Gilt 1-5 Year UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg UK Gilt 1-5 Year Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy. In tracking the Reference Index, the Investment Manager applies the Sampling Strategy which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration, industry sectors and credit quality.

The Reference Index measures the total return performance of the GBP-denominated, fixed-rate, investment grade public obligations issued by the United Kingdom with years remaining to maturity between 1 and 5 year.

The Reference Index tracks nominal gilt issues only and inflation linked bonds are not eligible for inclusion.

In order to be included in the Reference Index, securities must have between 1 and 5 years remaining to maturity, securities' principal and interest must be denominated in GBP and securities which comprise the Reference Index must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality.

To be eligible for inclusion in the Reference Index, bonds must have GBP 200mn minimum par amount outstanding. Gilts held by the Bank of England are eligible in the Reference Index. Both fixed-rate coupon and original zero-coupon issues are included in the Reference Index.

Invesco UK Gilts UCITS ETF

The investment objective of the Invesco UK Gilts UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg Sterling Gilt Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy. In tracking the Reference Index, the Investment Manager applies the Sampling Strategy which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration, industry sectors and credit quality.

The Reference Index measures the total return performance of the GBP-denominated, fixed-rate, investment grade public obligations issued by the government of the United Kingdom.

The Reference Index tracks nominal gilt issues only and inflation linked bonds are not eligible for inclusion. The Reference Index is a component of the Sterling Aggregate, Pan-European Aggregate, Global Aggregate and Global Treasury Indices.

In order to be included in the Reference Index, securities must have at least one year to final maturity regardless of optionality, securities' principal and interest must be denominated in GBP and securities which comprise the Reference Index must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality. Local currency treasury issues are classified using the middle issuer level rating from each agency for all outstanding bonds, even if bond level ratings are available.

To be eligible for inclusion in the Reference Index, bonds must have GBP 200mn minimum par amount outstanding. Gilts held by the Bank of England are eligible in the Reference Index. Both fixed-rate coupon and original zero-coupon issues are included in the Reference Index.

Investment Objectives and Policies (continued)

Invesco MSCI World ESG Universal Screened UCITS ETF

The investment objective of the Invesco MSCI World ESG Universal Screened UCITS ETF (the "Fund") is to achieve the performance of the MSCI World ESG Universal Select Business Screens Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index, by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index tracks the net total return performance of large and mid-capitalisation companies in developed markets worldwide and aims to represent the performance of an investment strategy that, by adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics, seeks to increase overall exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile. MSCI ESG metrics is a tool designed to produce a broad set of standardised ESG data and simple flagged metrics that are comparable across a broad universe of companies and used to assess the ESG profile of a company. ESG metrics cover risk exposure, controversies, performances and practices and take the following areas into account: climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and corporate behaviour.

The Reference Index is constructed from the MSCI World Index (the "Parent Index") by excluding from the Parent Index securities that: 1) have not been assessed or rated by the Index Provider on the basis of the ESG metrics; 2) have faced very severe controversies pertaining to ESG issues (including UN Global Compact violations) over the last three years; or 3) are involved in any of the following business activities: controversial weapons, conventional weapons, nuclear weapons, oil sands, thermal coal, cannabis and tobacco 4) have an MSCI ESG rating of CCC.

Each of the eligible component securities is then assigned a combined ESG score, which reflects the Index Provider's assessment of both the security's current ESG rating, as well as the trend in that rating, defined as the change in the security's ESG rating over time (the "Combined ESG Score"). This Combined ESG Score is then applied to re-weight the eligible securities from their free-float market cap weights in the Parent Index to construct the weighting of the Reference Index.

Invesco MSCI Europe ESG Universal Screened UCITS ETF

The investment objective of the Invesco MSCI Europe ESG Universal Screened UCITS ETF (the "Fund") is to achieve the performance of the MSCI Europe ESG Universal Select Business Screens Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index, by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index tracks the net total return performance of large- and mid-capitalisation companies in Europe and aims to represent the performance of an investment strategy that, by adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics, seeks to increase overall exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile. MSCI ESG metrics is a tool designed to produce a broad set of standardised ESG data and simple flagged metrics that are comparable across a broad universe of companies and used to assess the ESG profile of a company. ESG metrics cover risk exposure, controversies, performances and practices and take the following areas into account: climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and corporate behaviour.

The Reference Index is constructed from the MSCI Europe Index (the "Parent Index") by excluding from the Parent Index securities that: 1) have not been assessed or rated by the Index Provider on the basis of the ESG metrics; 2) have faced very severe controversies pertaining to ESG issues (including UN Global Compact violations) over the last three years; or 3) are involved in any of the following business activities: controversial weapons, conventional weapons, nuclear weapons, oil sands, thermal coal, and civilian firearms, recreational cannabis and tobacco; 4) have an MSCI ESG rating of CCC.

Each of the eligible component securities is then assigned a combined ESG score, which reflects the Index Provider's assessment of both the security's current ESG rating, as well as the trend in that rating, defined as the change in the security's ESG rating over time (the "Combined ESG Score"). This Combined ESG Score is then applied to re-weight the eligible securities from their free-float market cap weights in the Parent Index to construct the weighting of the Reference Index.

Invesco MSCI USA ESG Universal Screened UCITS ETF

The investment objective of the Invesco MSCI USA ESG Universal Screened UCITS ETF (the "Fund") is to achieve the performance of the MSCI USA ESG Universal Select Business Screens Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index, by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index tracks the net total return performance of large- and mid-capitalisation companies in the USA and aims to represent the performance of an investment strategy that, by adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics, seeks to increase overall exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile. MSCI ESG metrics is a tool designed to produce a broad set of standardised ESG data and simple flagged metrics that are comparable across a broad universe of companies and used to assess the ESG profile of a company. ESG metrics cover risk exposure, controversies, performances and practices and take the following areas into account: climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and corporate behaviour.

The Reference Index is constructed from the MSCI USA Index (the "Parent Index") by excluding from the Parent Index securities that: 1) have not been assessed or rated by the Index Provider on the basis of the ESG metrics; 2) have faced very severe controversies pertaining to ESG issues (including UN Global Compact violations) over the last three years; or 3) are involved in any of the following business activities: controversial weapons, conventional weapons, nuclear weapons, oil sands, thermal coal, civilian firearms, recreational cannabis and tobacco; 4) have an MSCI ESG rating of CCC.

Investment Objectives and Policies (continued)

Invesco MSCI USA ESG Universal Screened UCITS ETF (continued)

Each of the eligible component securities is then assigned a combined ESG score, which reflects the Index Provider's assessment of both the security's current ESG rating, as well as the trend in that rating, defined as the change in the security's ESG rating over time (the "Combined ESG Score"). This Combined ESG Score is then applied to re-weight the eligible securities from their free-float market cap weights in the Parent Index to construct the weighting of the Reference Index.

Invesco MSCI Pacific ex Japan ESG Universal Screened UCITS ETF

The investment objective of the Invesco MSCI Pacific ex Japan ESG Universal Screened UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI Pacific ex Japan ESG Universal Select Business Screens Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances, for example, market dominance.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index tracks the performance of large- and mid-capitalisation companies across Australia, Hong Kong, New Zealand and Singapore and aims to represent the performance of an investment strategy that, by adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance (ESG) metrics, seeks to increase overall exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile.

The Reference Index is constructed from the MSCI Pacific ex Japan Index (the "Parent Index") by using the index provider's ESG exclusionary criteria to exclude from the Parent Index securities that: 1) have not been assessed or rated by the Index Provider on the basis of the ESG metrics; 2) have faced very severe controversies pertaining to ESG issues (including UN Global Compact violations) over the last three years; or 3) are involved (as defined by the Index Provider) in any of the following business activities: controversial weapons, conventional weapons, nuclear weapons, oil sands, thermal coal, civilian firearms, recreational cannabis and tobacco; 4) have an MSCI ESG rating of CCC.

Invesco MSCI Japan ESG Universal Screened UCITS ETF

The investment objective of the Invesco MSCI Japan ESG Universal Screened UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI Japan ESG Universal Select Business Screens Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances, for example, market dominance.

The Reference Index tracks the performance of large- and mid-capitalisation companies across Japan and aims to represent the performance of an investment strategy that, by adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics, seeks to increase overall exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile. MSCI ESG metrics is a tool designed to produce a broad set of standardised ESG data and simple flagged metrics that are comparable across a broad universe of companies and used to assess the ESG profile of a company. ESG metrics cover risk exposure, controversies, performances and practices and take the following areas into account: climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and corporate behaviour.

Invesco MSCI EMU ESG Universal Screened UCITS ETF

The investment objective of the Invesco MSCI EMU ESG Universal Screened UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI EMU ESG Universal Select Business Screens Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances, for example, market dominance. Market dominance exists where a particular component of the Reference Index has a dominant position in the particular market sector or geographical region in which it operates and as a result accounts for a large proportion of the Reference Index. This means that the Fund may have a high concentration of investment in a particular issuer.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index tracks the performance of large- and mid-capitalisation companies across the 10 Developed Markets in the EMU (European Economic and Monetary Union) and aims to represent the performance of an investment strategy that, by adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics, seeks to increase overall exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile. MSCI ESG metrics is a tool designed to produce a broad set of standardised ESG data and simple flagged metrics that are comparable across a broad universe of companies and used to assess the ESG profile of a company. ESG metrics cover risk exposure, controversies, performances and practices and take the following areas into account: climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and corporate behaviour.

Invesco MSCI Europe ex UK ESG Universal Screened UCITS ETF

The investment objective of the Invesco MSCI Europe ex UK ESG Universal Screened UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI Europe ex UK ESG Universal Select Business Screens Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances, for example, market dominance. Market dominance exists where a particular component of the Reference Index has a dominant position in the particular market sector or geographical region in which it operates and as a result accounts for a large proportion of the Reference Index. This means that the Fund may have a high concentration of investment in a particular issuer.

Investment Objectives and Policies (continued)

Invesco MSCI Europe ex UK ESG Universal Screened UCITS ETF (continued)

The Reference Index tracks the performance of large- and mid-capitalisation companies across 14 Developed Markets in Europe (excluding the UK) and aims to represent the performance of an investment strategy that, by adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics, seeks to increase overall exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile. MSCI ESG metrics is a tool designed to produce a broad set of standardised ESG data and simple flagged metrics that are comparable across a broad universe of companies and used to assess the ESG profile of a company. ESG metrics cover risk exposure, controversies, performances and practices and take the following areas into account: climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and corporate behaviour.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco MSCI Emerging Markets ESG Universal Screened UCITS ETF

The investment objective of the Invesco MSCI Emerging Markets ESG Universal Screened UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI EM (Emerging Markets) ESG Universal Select Business Screens Index (the "Reference Index") less fees, expenses and transaction costs.

The Reference Index tracks the performance of large- and mid-capitalisation companies across 26 Emerging Market (EM) countries and aims to represent the performance of an investment strategy that, by adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics, seeks to increase overall exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile. MSCI ESG metrics is a tool designed to produce a broad set of standardised ESG data and simple flagged metrics that are comparable across a broad universe of companies and used to assess the ESG profile of a company. ESG metrics cover risk exposure, controversies, performances and practices and take the following areas into account: climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and corporate behaviour. The Reference Index is rebalanced on a semi-annual basis.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" and section 5 "Investment Restrictions and Permitted Investments" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco Quantitative Strategies ESG Global Equity Multi-Factor UCITS ETF

The investment objective of the Invesco Quantitative Strategies ESG Global Equity Multi-Factor UCITS ETF (the "Fund") is to achieve a long-term return in excess of the MSCI World Index (the "Benchmark") by investing in an actively-managed portfolio of global equities that meet environmental, social, and corporate governance criteria (the "ESG Criteria").

The Fund invests primarily in a portfolio of equity and equity-related securities of companies from developed markets worldwide. Securities are selected by the Sub-Investment Manager based on 1) compliance with the Funds ESG Criteria, 2) attractiveness determined in accordance with the sub-investment managers quantitative investment model, and 3) consistency between the portfolio's expected risk characteristics and the Funds investment Objectives.

The Reference Index tracks the performance of large and mid-capitalisation companies across developed markets worldwide. The Reference Index draws its constituents from the financials, information technology, health care, industrials, consumer discretionary, consumer staples, communication services, energy, materials, utilities and real estate sectors. The Reference Index is comprised of 1,654 constituents from Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States.

Invesco Euro Government Bond UCITS ETF

The investment objective of the Invesco Euro Government Bond UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg Euro Treasury Majors Bond Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy, which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality.

The Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to measure the total return performance of EUR-denominated, fixed-rate government debt.

To be eligible for inclusion in the reference index, eligible securities' principal and interest must be denominated in EUR. The securities that comprise the reference index must be rated investment grade (Baa3/BBB-/BBB-) or higher, and to remain the Reference Index securities must be rated B3/B-/B- or higher using the middle rating of Moody's, S & P and Fitch, after dropping the highest and lowest available ratings. Local currency treasury issues are rated using the long-term local currency sovereign rating from Moody's, S&P and Fitch. Expected ratings at issuance may be used when other Reference Index - eligible bonds from the same issuer hold the same actual rating as the expected rating.

To be eligible for inclusion in the reference index, bonds must have EUR 300mn minimum par amount outstanding.

Investment Objectives and Policies (continued)

Invesco Euro Government Bond 1-3 Year UCITS ETF

The investment objective of the Invesco Euro Government Bond 1-3 Year UCITS ETF (the "Fund") is to deliver the performance of the Bloomberg Euro Government Select 1-3 Year Index (the 'Reference Index') less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy, which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality.

The Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to measure the total return of EUR-denominated, fixed-rate government debt with remaining time to maturity between 1 and 3 years issued by: France, Germany, Italy, Netherlands, and Spain.

Eligible Currencies: Principal and Interest must be denominated in EUR.

Quality: Securities must be rated B3/B-/B- or higher using the middle rating of Moody's, S&P and Fitch after dropping the highest and lowest available ratings.

To be eligible for inclusion in the reference index, eligible securities' principal and interest must be denominated in EUR. The securities that comprise the reference index must be rated B3/B-/B- or higher using the middle rating of Moody's, S&P and Fitch after dropping the highest and lowest available ratings. Local currency treasury issues are rated using the long-term local currency sovereign rating from Moody's, S&P and Fitch. Expected ratings at issuance may be used when other Reference Index-eligible bonds from the same issuer hold the same actual rating as the expected rating.

To be eligible for inclusion in the reference index, bonds must have EUR 300mn minimum par amount outstanding.

Invesco Euro Government Bond 3-5 Year UCITS ETF

The investment objective of the Invesco Euro Government Bond 3-5 Year UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg Euro Government Select 3-5 Year Index (the 'Reference Index') less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy, which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality.

The Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index measures the total return performance of the EUR-denominated, fixed-rate, investment-grade government debt with remaining time to maturity between 3-5 years issued by: France, Germany, Italy, Netherlands and Spain.

To be eligible for inclusion in the reference index, eligible securities' principal and interest must be denominated in EUR. The securities that comprise the reference index must be rated B3/B-/B- or higher using the middle rating of Moody's, S&P and Fitch after dropping the highest and lowest available ratings. Local currency treasury issues are rated using the long-term local currency sovereign rating from Moody's, S&P and Fitch. Expected ratings at issuance may be used when other Reference Index-eligible bonds from the same issuer hold the same actual rating as the expected rating.

To be eligible for inclusion in the reference index, bonds must have EUR 300mn minimum par amount outstanding.

Invesco Euro Government Bond 5-7 Year UCITS ETF

The investment objective of the Invesco Euro Government Bond 5-7 Year UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg Euro Government Select 5-7 Year Index (the 'Reference Index') less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy, which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality.

The Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to measure the total return performance of the EUR-denominated, fixed-rate, investment-grade government debt with remaining time to maturity between 5-7 years issued by: France, Germany, Italy, Netherlands and Spain.

To be eligible for inclusion in the reference index, eligible securities' principal and interest must be denominated in EUR. The securities that comprise the reference index must be rated B3/B-/B- or higher using the middle rating of Moody's, S&P and Fitch after dropping the highest and lowest available ratings. Local currency treasury issues are rated using the long-term local currency sovereign rating from Moody's, S&P and Fitch. Expected ratings at issuance may be used when other Reference Index-eligible bonds from the same issuer hold the same actual rating as the expected rating.

To be eligible for inclusion in the reference index, bonds must have EUR 300mn minimum par amount outstanding.

Investment Objectives and Policies (continued)

Invesco Euro Government Bond 7-10 Year UCITS ETF

The investment objective of the Invesco Euro Government Bond 7-10 Year UCITS ETF (the "Fund") is to achieve the performance of the Bloomberg Euro Government Select 7-10 Year Index: (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy, which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality.

The Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to measure the total return performance of the EUR-denominated, fixed-rate, investment-grade government debt with remaining time to maturity between 7-10 years issued by: France, Germany, Italy, Netherlands and Spain.

Eligible Currencies: Principal and Interest must be denominated in EUR.

Quality: Securities must be rated B3/B-/B- or higher using the middle rating of Moody's, S&P and Fitch after dropping the highest and lowest available ratings.

To be eligible for inclusion in the reference index, eligible securities' principal and interest must be denominated in EUR. The securities that comprise the reference index must be rated B3/B-/B- or higher using the middle rating of Moody's, S&P and Fitch after dropping the highest and lowest available ratings. Local currency treasury issues are rated using the long-term local currency sovereign rating from Moody's, S&P and Fitch. Expected ratings at issuance may be used when other Reference Index-eligible bonds from the same issuer hold the same actual rating as the expected rating.

To be eligible for inclusion in the reference index, bonds must have EUR 300mn minimum par amount outstanding.

Invesco MSCI China All Shares Stock Connect UCITS ETF

The investment objective of the Invesco MSCI China All Shares Stock Connect UCITS ETF (the "Fund") is to achieve the net total return of the MSCI China All Shares Stock Connect Select Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances, for example, market dominance. Market dominance exists where a particular component of the Reference Index has a dominant position in the particular market sector or geographical region in which it operates and as a result accounts for a large proportion of the Reference Index. This means that the Fund may have a high concentration of investment in a particular issuer.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to reflect the performance of large and mid-capitalisation stocks of the Chinese equity market across China A shares, China B shares, China H shares, Red chips, P chips and foreign listings (e.g. American Depositary Receipts ("ADRs")). The Reference Index aims to represent the performance of the opportunity set of China share classes listed in Hong Kong, Shanghai, Shenzhen and outside of China. It is based on the concept of the integrated MSCI China equity universe with Stock Connect eligible China A shares included.

Invesco MSCI China Technology All Shares Stock Connect UCITS ETF

The investment objective of the Invesco MSCI China Technology All Shares Stock Connect UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI China Technology All Shares Stock Connect Select Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

The Reference Index is designed to reflect the performance of large and mid-capitalisation technology stocks of the Chinese equity market across China A shares, China B shares, China H shares, Red chips, P chips and foreign listings (e.g. American Depositary Receipts ("ADRs")). The Reference index aims to represent the performance of a set of companies that are expected to derive significant revenue (as explained below) from the development of new products and services from technology innovations leading to breakthroughs in areas such as internet and digitisation, mobility, autonomous technology, industrial automation and digital healthcare. The Reference Index includes large and mid-cap A shares accessible through the Stock Connect program.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco FTSE All Share ESG Climate UCITS ETF

The investment objective of the Invesco FTSE All Share ESG Climate UCITS ETF (the "Fund") is to achieve the net total return performance of the FTSE All Share ex Investment Trusts ESG Climate Select Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" of the Prospectus.

Investment Objectives and Policies (continued)

Invesco FTSE All Share ESG Climate UCITS ETF (continued)

The Reference Index is designed to reflect the performance of large- and mid-capitalisation companies in the UK equity market and, by re-weighting constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics, seeks to increase exposure to those companies demonstrating a robust ESG profile, those generating an increased percentage of their revenue from green projects, and those that exhibit lower levels of carbon emissions and fossil fuel reserves.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco Global Clean Energy UCITS ETF

The investment objective of the Invesco Global Clean Energy UCITS ETF (the "Fund") is to achieve the net total return performance of the WilderHill New Energy Global Innovation Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to reflect the performance of global companies whose innovative technologies focus on the generation and use of cleaner energy, conservation, efficiency and the advancement of renewable energy. It is mainly composed of companies focused in wind, solar, biofuels, hydro, wave, tidal, geothermal and other relevant renewable energy businesses, as well as energy conversion, storage, conservation, efficiency, materials relating to those activities, carbon and greenhouse gas reduction, pollution control, emerging hydrogen and fuel cells.

Invesco US Municipal Bond UCITS ETF

The investment objective of the Invesco US Municipal Bond UCITS ETF (the "Fund") is to achieve the total return performance of the ICE BofA US Taxable Municipal Securities Plus Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy ("Sampling Strategy").

In tracking the Reference Index, the Investment Manager applies the Sampling Strategy, which includes the use of quantitative analysis, to select securities from the Reference Index with the goal of matching key characteristics of the Reference Index such as the weighted average duration, industry weights, issuer types, regional exposures and credit quality.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy, the Fund may also hold securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition is expected to improve the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated.

Whilst the level of sampling will vary over the life of the Fund depending on asset levels of the Fund, market structure and other factors, including liquidity, degree of correlation across different subsets of the taxable municipal market, the volume of issuances in the taxable municipal bond market and the diversity of different types of issuing entities, it is generally expected that the Fund will hold a total number of securities that is significantly less than the number in the Reference Index – frequently less than 10% – though this may change and the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective. The Fund will hold municipal securities (being debt securities issued by state and local governments in the United States, which are generally used to finance public projects), corporate bonds and other types of securities that may comprise the Reference Index.

The reason the Investment Manager expects to hold a significantly fewer securities than what is found in the Reference Index is that the issuance of municipal securities is frequently done in multiple, smaller issuances rather than in the less frequent, larger issues that are common in, for example, the investment grade corporate bond markets. As a result, the Reference Index has a very large number of individual securities with highly similar characteristics. It is these characteristics that the Investment Manager looks to replicate with the Sampling Strategy.

In addition, while the Investment Manager expects to manage the majority of inflows and outflows from the fund through purchase and sale of securities in the secondary market, the Investment Manager will participate significantly in the primary market as newly issued securities frequently exhibit attractive pricing and secondary market liquidity. These securities may not yet be included in the Reference Index and there is no guarantee that they will be included.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" of the Prospectus.

The Reference Index is designed to reflect the performance of US dollar denominated taxable municipal debt publicly issued by US states and territories, and their political subdivisions, in the US domestic market.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco NASDAQ Next Generation 100 UCITS ETF

The investment objective of the Invesco NASDAQ Next Generation 100 UCITS ETF (the "Fund") is to achieve the net total return performance of the NASDAQ Next Generation 100 Index[®] (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to reflect the performance of the next generation of Nasdaq-listed non-financial companies; that is, the largest 100 Nasdaq-listed companies outside of the NASDAQ-100 Index[®] based on market capitalisation.

Investment Objectives and Policies (continued)

Invesco NASDAQ Next Generation 100 UCITS ETF (continued)

To be eligible for inclusion in the Reference Index, a security must meet the existing Eligibility Criteria of the NASDAQ-100 Index[®], an index that measures the performance of 100 of the largest US domestic and international Nasdaq-listed non-financial companies by market capitalisation. Securities meeting the NASDAQ-100 Index[®] Eligibility Criteria are ranked by market capitalisation, with the largest 100 securities not currently in the NASDAQ-100 Index[®] selected for inclusion in the Reference Index.

Invesco S&P 500 Equal Weight UCITS ETF

The investment objective of the Invesco S&P 500 Equal Weight UCITS ETF (the "Fund") is to achieve the net total return performance of the S&P 500 Equal Weight Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index measures the performance of the companies in the S&P 500 index (the "Parent Index") when taking a size neutral approach. The Parent Index is designed to reflect the US large-cap equity market, by including 500 leading companies and covering approximately 80% of the available market capitalisation.

The Reference Index is constructed from the Parent Index by including the same constituent securities of the Parent Index, but equally weighting each constituent security at each rebalancing date, rather than weighting such constituents by float-adjusted market capitalisation.

Invesco S&P 500 Low Volatility UCITS ETF

The investment objective of the Invesco S&P 500 Low Volatility UCITS ETF (the "Fund") is to achieve the net total return performance of the S&P 500 Low Volatility Index (the "Reference Index") less fees, expenses and transaction costs.

The Reference Index measures the performance of the 100 least volatile stocks in the S&P 500 index (the "Parent Index"). The Parent Index is designed to reflect the US large-cap equity market, by including 500 leading companies and covering approximately 80% of the available market capitalisation. The Reference Index rebalances quarterly.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances, for example, market dominance. Market dominance exists where a particular component of the Reference Index has a dominant position in the particular market sector or geographical region in which it operates and as a result accounts for a large proportion of the Reference Index. This means that the Fund may have a high concentration of investment in a particular issuer.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" and section 5 "Investment Restrictions and Permitted Investments" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco USD High Yield Corporate Bond ESG UCITS ETF

The investment objective of the Invesco USD High Yield Corporate Bond ESG UCITS ETF (the "Fund") is to achieve the total return performance of the Bloomberg MSCI USD High Yield Liquid Corporate ESG Weighted SRI Bond Index (the "Reference Index") less fees, expenses and transaction costs.

The Reference Index is designed to reflect the performance of USD-denominated high yield, fixed-rate securities issued by corporate issuers adjusted based upon certain environmental, social and governance ("ESG") metrics, which seek to increase overall exposure to those issuers demonstrating a robust ESG profile. The index includes publicly issued securities by industrial, utility and financial institution issuers in global and regional markets. Bonds issued by emerging markets issuers are excluded. The Reference Index rebalances monthly.

In tracking the Reference Index, the Investment Manager applies the Sampling Strategy, which includes the use of quantitative analysis, to select securities from the Reference Index that use factors such as the index weighted average duration, industry sectors and credit quality.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Investment Objectives and Policies (continued)

Invesco Solar Energy UCITS ETF

The investment objective of the Invesco Solar Energy UCITS ETF (the "Fund") is to achieve the net total return performance of the MAC Global Solar Energy Index (the "Reference Index") less fees, expenses and transaction costs.

The Reference Index is a thematic index which is designed to reflect the performance of the global solar energy equity sector and includes companies who derive significant revenue from solar business activities. The Reference Index is reconstituted and rebalanced quarterly.

Companies eligible for inclusion in the Reference Index are reviewed annually and may be excluded if according to S&P's exclusionary criteria: 1) the company is engaged in (as defined by S&P) the business of the extraction of coal, petroleum, or natural gas; or 2) the company is engaged in (as defined by S&P) the business of generating electricity for sale to third parties using coal, petroleum (oil), or nuclear fuel; and 3) the company has an S&P Governance and Economic Score of 0. If the company is not covered from a data availability perspective to test for exclusionary business activities then the security shall be eligible for inclusion in the Reference Index subject to the below further eligibility criteria.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" and section 5 "Investment Restrictions and Permitted Investments" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco NASDAQ-100 ESG UCITS ETF

The investment objective of the Invesco NASDAQ-100 ESG UCITS ETF (the "Fund") is to achieve the net total return performance of the NASDAQ-100[®] ESG Index (the "Reference Index") less fees, expenses and transaction costs.

The Reference Index is designed to reflect the performance of the companies in the Nasdaq-100 Index[®] that meet specific ESG criteria. Companies are evaluated and weighted on the basis of their business activities, controversies and ESG Risk Ratings. The Reference Index is reconstituted and rebalanced quarterly.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" and section 5 "Investment Restrictions and Permitted Investments" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco MSCI Europe ESG Climate Paris Aligned UCITS ETF

The investment objective of the Invesco MSCI Europe ESG Climate Paris Aligned UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI Europe ESG Climate Paris Aligned Benchmark Select Index (the "Reference Index") less fees, expenses and transaction costs, thereby taking an approach that seeks to reduce the Fund's exposure to transition and physical climate risks whilst pursuing opportunities arising from a transition to a lower carbon economy and aligning with the Paris Agreement requirements.

The Reference Index tracks the performance of large and mid-capitalisation companies across developed markets in Europe and aims to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy while aligning with the Paris Agreement requirements. The Reference Index also provides exposure to companies with high ESG metrics and incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. The Reference Index rebalances on a semi-annual basis.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" and section 5 "Investment Restrictions and Permitted Investments" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco MSCI USA ESG Climate Paris Aligned UCITS ETF

The investment objective of the Invesco MSCI USA ESG Climate Paris Aligned UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI USA ESG Climate Paris Aligned Benchmark Select Index (the "Reference Index") less fees, expenses and transaction costs, thereby taking an approach that seeks to reduce the Fund's exposure to transition and physical climate risks whilst pursuing opportunities arising from a transition to a lower carbon economy and aligning with the Paris Agreement requirements.

The Reference Index tracks the performance of large and mid-capitalisation companies of the US market and aims to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy while aligning with the Paris Agreement requirements. The Reference Index also provides exposure to companies with high ESG metrics and incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. The Reference Index rebalances on a semi-annual basis.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

Investment Objectives and Policies (continued)

Invesco MSCI USA ESG Climate Paris Aligned UCITS ETF (continued)

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" and section 5 "Investment Restrictions and Permitted Investments" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco MSCI Japan ESG Climate Paris Aligned UCITS ETF

The investment objective of the Invesco MSCI Japan ESG Climate Paris Aligned UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI Japan ESG Climate Paris Aligned Benchmark Select Index (the "Reference Index") less fees, expenses and transaction costs, thereby taking an approach that seeks to reduce the Fund's exposure to transition and physical climate risks whilst pursuing opportunities arising from a transition to a lower carbon economy and aligning with the Paris Agreement requirements.

The Reference Index tracks the performance of large and mid-capitalisation companies across Japan and aims to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy while aligning with the Paris Agreement requirements. The Reference Index also provides exposure to companies with high ESG metrics and incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. The Reference Index rebalances on a semi-annual basis.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" and section 5 "Investment Restrictions and Permitted Investments" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco MSCI World ESG Climate Paris Aligned UCITS ETF

The investment objective of the Invesco MSCI World ESG Climate Paris Aligned UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI World ESG Climate Paris Aligned Benchmark Select Index (the "Reference Index") less fees, expenses and transaction costs, thereby taking an approach that seeks to reduce the Fund's exposure to transition and physical climate risks whilst pursuing opportunities arising from a transition to a lower carbon economy and aligning with the Paris Agreement requirements.

The Reference Index tracks the performance of large and mid-capitalisation companies in developed markets worldwide and aims to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy while aligning with the Paris Agreement requirements. The Reference Index also provides exposure to companies with high ESG metrics and incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. The Reference Index rebalances on a semi-annual basis.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" and section 5 "Investment Restrictions and Permitted Investments" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

Invesco MSCI Emerging Markets ESG Climate Paris Aligned UCITS ETF

The investment objective of the Invesco MSCI Emerging Markets ESG Climate Paris Aligned UCITS ETF (the "Fund") is to achieve the net total return performance of the MSCI Emerging Markets ESG Climate Paris Aligned Benchmark Select Index (the "Reference Index") less fees, expenses and transaction costs, thereby taking an approach that seeks to reduce the Fund's exposure to transition and physical climate risks whilst pursuing opportunities arising from a transition to a lower carbon economy and aligning with the Paris Agreement requirements.

In order to achieve the investment objective, the Fund will employ a sampling strategy, which includes the use of quantitative analysis and uses factors such as country weights, industry sector weights, market capitalisation, dividend yield and liquidity to select securities from the Reference Index that results in a portfolio that has an investment profile similar to that of the Reference Index.

Where consistent with its investment objective, and in conjunction with the use of a sampling strategy, the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk, return and environmental, social and governance ("ESG") characteristics either (a) closely resemble the risk, return and ESG characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated.

The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

Investment Objectives and Policies (continued)

Invesco Dow Jones Islamic Global Developed Markets UCITS ETF

The investment objective of the Invesco Dow Jones Islamic Global Developed Markets UCITS ETF (the "Fund") is to achieve the net total return performance of the Invesco Dow Jones Islamic Market Developed Markets Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy ("Sampling Strategy"), which includes the use of quantitative analysis and uses factors such as country weights, industry sector weights, market capitalisation, dividend yield and liquidity to select securities from the Reference Index that results in a portfolio that has an investment profile similar to that of the Reference Index. Investments made by the Fund will be compliant with Shari'ah guidelines prescribed by the Index Provider. The Shari'ah committee (the "Shari'ah Committee") appointed by the Investment Manager will be responsible for determining compliance of the Fund's investments with Shari'ah. Further information on the Shari'ah Committee is set out below under the heading "Shari'ah Committee".

The Fund shall not hold securities which are not component securities of the Reference Index, unless their future inclusion into the Reference Index is anticipated (which is determined by reference to the Reference Index rebalancing file which may be published by the Index Provider prior to each rebalancing date, as set out under the heading "Index Rebalancing"). The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

Tracking Error Analysis

Realised tracking error and realised tracking difference are in line with expectations. The tracking difference between the Funds and the benchmark index/strategy is mainly driven by the management fee.

Notes to the Financial Statements

1. Significant Accounting Policies

A) General Information

Invesco Markets II plc (the "Company") is an open-ended variable capital company with segregated liability between Funds of the Company ("Funds"). The Company was incorporated on 11 September 2015. It is organised under the laws of Republic of Ireland as a public limited company pursuant to the Companies Act 2014 (as amended) and as an undertaking for collective investment in transferable securities pursuant to the European Communities ("Undertakings for Collective Investment in Transferable Securities") Regulations 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities Regulations 2019 (the "Central Bank UCITS Regulations"). Please see page 6 to 9 for General Information on the Umbrella.

Basis of preparation

These Financial Statements have been prepared on a going concern basis. Costs associated with the termination of these Funds will be borne by the Manager with no provision being made in these Financial Statements for such costs. The Financial Statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") endorsed by the European Union (EU), the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertaking for Collective Investment in Transferable Securities (Amendment) Regulation 2019 (the "Central Bank UCITS Regulations"). The Financial Statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through profit or loss. The significant accounting policies are set out below.

The preparation of Financial Statements in accordance with IFRS, as adopted by the EU, requires the use of certain critical estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the Financial Statements are disclosed in Notes 1 c) (iii) and 1 d).

International Financial Reporting Standards

The same accounting policies and methods of computation are followed in these interim report and unaudited financial statements as compared with the year ended 31 December 2021 audited set of financial statements prepared under IFRS.

The unaudited interim financial statements should be read in conjunction with the audited financial statements for the financial year ended 31 December 2021.

B) Functional and presentation currency

The Board of Directors considers the Euro as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions.

The Financial Statements of the Company are presented in Euro, which is both the functional and presentation currency.

Each individual Fund's functional currency is disclosed on pages 10 and 11.

Transactions and balances

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognised together with other changes in the fair value. Net currency gains/(losses) are net foreign exchange gains and losses on monetary financial assets and liabilities other than those classified at fair value through profit or loss.

Assets and liabilities denominated in foreign currencies, other than the functional currency of the Company, have been translated at the rate of exchange ruling at 30 June 2022. Transactions in foreign currencies are translated into Euro at the exchange rate ruling at the date of the transaction. All gains and losses on foreign exchange are recognised in the Statements of Comprehensive Income in net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in determining the result for the financial period.

C) Financial assets and financial liabilities at fair value through profit or loss

(i) Classification

IFRS 9 sets out three potential categories for financial assets. These are amortised cost, fair value through other comprehensive income, and financial assets at fair value through profit and loss ("FVTPL"). The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics.

A debt instrument is measured at fair value through comprehensive income if the objective of the business model is to hold the financial asset both to collect contractual cash flows from SPPI and to sell. All other debt instruments must be recognised at fair value through profit or loss. An entity may however, at initial recognition, irrevocably designate a financial asset as measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency.

Pursuant to IFRS 9, a portfolio of financial assets that is managed and whose performance is evaluated on a fair value basis is neither held to collect contractual cash flows or held both to collect contractual cash flows and to sell financial assets. The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. In addition, a portfolio of financial assets that meets the definition of held for trading is not held to collect contractual cash flows or held both to collect contractual cash flows and to sell financial assets. For such portfolios, the collection of contractual cash flows is only incidental to achieving the business model's objective. Consequently, such portfolios of financial assets must be measured at FVTPL.

The carrying amounts of cash and cash equivalents, accrued interest income from financial assets at fair value through profit or loss, amounts due from/to brokers, accrued management fees and distributions payable is approximate fair value due to the immediate or short term nature of these financial instruments.

The Company's financial assets and liabilities are initially recorded at their transaction price and then measured at fair value subsequent to initial recognition. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the Statement of Comprehensive Income in the financial period in which they arise.

Financial assets other than financial assets at fair value through profit or loss include cash and cash equivalents, balances due from brokers, dividend income receivable, capital shares receivable, interest from financial assets at fair value through profit and loss receivable and accrued income and other receivables.

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

C) Financial assets and financial liabilities at fair value through profit or loss (continued)

(i) Classification (continued)

Financial liabilities that were not at fair value through profit or loss include bank overdraft, balances due to brokers, capital shares payable, variation margin payable, creditors (amounts falling due within one year) and financial liabilities arising on redeemable shares.

All of the Funds' investments are classified as financial assets and financial liabilities at fair value through profit or loss as at 30 June 2022 and 30 June 2021.

(ii) Recognition, derecognition and measurement

Regular purchases and sales of financial assets are recognised on the trade date. Any gains and losses, arising from changes in fair value of the financial assets or financial liabilities, are recorded from this date.

The Company recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument, and all significant rights and access to the benefits from the assets or liabilities, and the exposure to the risks inherent in those benefits, are transferred to the Company. The Company derecognises financial assets and financial liabilities when all such benefits and risks are transferred from the Company. Investment transactions are recorded on a trade date basis. Realised gains and losses are based on the high cost method for all Funds.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the Statements of Comprehensive Income with other net changes in fair value of financial assets and liabilities at fair value through profit or loss in the financial period in which they arise.

(iii) Valuation of investments

The estimation of fair value, after initial recognition, is determined as follows:

Listed investments

The fair value of investments which are quoted, listed, traded or dealt with on a market or exchange are based on quoted prices which, for the purpose of the Financial Statements, is the last traded market price for preferred shares, equities and exchange traded futures and the bid price for debt securities, comprising corporate bonds and government bonds.

Realised gains or losses on disposal of investments during the financial year and unrealised gains and losses on valuation of investments held at the financial period-end are included in the Statements of Comprehensive Income, within net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss.

The fixed income securities on all Funds were priced at Evaluated Bid (with the exception of the Invesco Variable Rate Preferred Shares UCITS ETF and Invesco US Municipal Bond UCITS ETF which were priced at Evaluated Mid during the financial reporting period).

The Funds actively trade in debt securities, some of which are variable rate. As at 30 June 2022, the Funds did not hold any amounts in variable rate debt investments linked to LIBOR which may potentially be transitioned to an alternative benchmark before the Funds disposes of the investments. The impact of this transition, if any, will be captured in the change in fair value of these investments and is not expected to be material to the Funds.

A forward currency contract involves an obligation to purchase or sell a specific currency at a future date, at a price set at the time the contract is made. Forward currency contracts are valued by reference to the forward price at which a new forward contract at the same size and maturity could be undertaken at the valuation date. The unrealised gain or loss on open forward currency contracts is calculated as the difference between the contract rate and the forward price and is recognised in the Statement of comprehensive income.

(iv) Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statements of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously. No such offsetting has occurred as at 30 June 2022 or 31 December 2021.

D) Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. There were no estimates and assumptions that had a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities as of the financial period end date.

All of the Funds' financial assets and financial liabilities were held for the purpose of being traded at fair value through profit or loss.

The application of IFRS 9 and the classification of the financial assets at FVTPL is a key judgement applied by management.

Debt Securities

The fair value of debt securities are based on evaluated bid prices at the Statement of Financial Position date. Variable Rate Preferred Shares UCITS ETF and US Municipal Bond UCITS ETF fixed income securities are priced at Evaluated Mid prices. The market prices are obtained from reputable pricing sources. The Company would exercise judgement on the quantity and quality of pricing sources used. Where no market price is available the Company will determine the fair value using valuation techniques. These valuation techniques include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis and other valuation techniques used by market participants. There were no debt securities valued using such valuation techniques at current period end or prior year end.

E) Fees and expenses

In accordance with the Prospectus the management fees were charged to the Statements of Comprehensive Income on an accruals basis. Other than the management fees, all fees and expenses incurred by the Funds including those payable to the Investment Manager, the Depositary, the Administrator, the Auditor and the Directors were paid by the Manager.

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

F) Cash and cash equivalents

As at 30 June 2022 and 31 December 2021, cash in all Funds was held on deposit with The Bank of New York Mellon SA/NV, Dublin Branch. Cash and cash equivalents includes cash in hand, deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less and bank overdrafts. Cash and Cash Equivalents are shown in current assets in the statement of financial positions. Bank overdrafts are shown in current liabilities in the statement of financial position. The Funds are allowed to have an overdraft facility in place which is in line with both the Depositary Agreement (under Depositary Duties) and UCITS regulations. Overdrawn balances are continuously monitored. Per the UCITS regulations, overdrafts are permitted within the set out limits. Intraday credit is provided to support the Funds' efficient portfolio management, as the Depositary cannot prevent overdrafts from occurring. The expectation is that the Investment Manager will clear any overdraft balances within 24-48 hours.

G) Redeemable shares

Redeemable Shares are redeemable at the Shareholders' option and are classified as financial liabilities. Any distributions on these shares are recognised in the Statements of Comprehensive Income as finance costs.

H) Fair value of net assets attributable to redeemable shareholders

In accordance with the provisions of the Prospectus and Supplements, debt securities, comprising corporate bonds and government bonds, are valued at bid price and preferred shares are valued at last traded market price on the valuation day for the purpose of determining the net asset value per share for subscriptions and redemptions and for various fee calculations.

I) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting used by the Chief Operating Decision Maker ("CODM"). The CODM, who is responsible for allocating resources and assessing the performance of the operating segments has been identified as the Board of Directors. The Board of Directors make the strategic resource allocations on behalf of the Company. The Company is managed as one operating segment which invest in equity instruments, debt instruments and related derivatives.

J) Distribution

The dividend arrangements relating to each Fund will be decided by the Directors at the time of the creation of the relevant Fund and details are set out where applicable in the relevant Supplement.

Under the Articles, the Directors are entitled to declare such dividends on any Class of Shares at such times as they think appropriate and as appear to be justified out of the profits of the relevant Fund, being (i) the accumulated revenue (consisting of all revenue accrued including interest and dividends) less expenses and/or (ii) realised and unrealised capital gains on the disposal/valuation of investments and other Funds less realised and unrealised accumulated capital losses of the relevant Fund and/or the capital of the relevant Fund. Where the dividends will be paid out of the capital of the relevant Fund, this will be disclosed in the relevant Supplement.

The Company total distributions figure should not be read in isolation, it is merely a consolidation of the Funds. Distributions should be viewed on a Fund level. There has not been an over distribution at Company level.

K) Dividend income

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any non-reclaimable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

L) Transaction costs

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers or dealers. Transaction costs, when incurred, are included as part of the cost of such purchases.

M) Interest Income and Interest from financial assets at FVTPL/Interest Income receivable and Interest from financial assets at FVTPL receivable

Interest income is recognised on a time-proportionate basis using the effective interest method. Interest income includes interest from cash and cash equivalents.

Interest from FVTPL is accrued on an effective yield basis and recognised in the Statement of Comprehensive Income. Interest on securities includes interest and discount earned (net of premium), which is the difference between the face value and the original cost, including original issue discount.

Interest earned whilst holding investment securities is reported as Interest from financial assets at FVTPL in the Statement of Comprehensive Income, whilst interest due to the Funds is reported as Interest from financial assets at FVTPL receivable in the Statement of Financial Position.

N) Balances due from/to brokers

Amounts due from/to brokers represent payables for securities purchased and receivables for securities sold that have been contracted for but not yet delivered or settled as at period end.

O) Setting up costs

The cost of establishing the Company and the Funds (including fees in connection with the incorporation and registration of the Company, listing the Funds on the relevant stock exchanges and registering the Funds for sale in other jurisdictions) will be paid by Invesco Investment Management Limited (the "Manager") and up until 22 August 2019 by Invesco UK Services Limited. The cost of establishing subsequent Funds will also be paid by the Manager unless otherwise provided in the Supplement for the relevant Fund.

P) Forward foreign currency contracts

A forward agreement is a customised, bilateral agreement to exchange an asset or cash flows at a specified future settlement date at a forward price agreed on the trade date. One party to the forward is the buyer (long), who agrees to pay the forward price on the settlement date; the other is the seller (short), who agrees to receive the forward price. Forward currency contracts could be used to hedge against currency risk that has resulted from assets held by the Funds that are not in the Base Currency. A Fund, may, for example, use forward currency contracts by selling forward a foreign currency against the Base Currency to protect the Funds from foreign exchange rate risk that has risen from holding assets in that currency.

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

Q) Open Exchange Traded Futures contracts

Open exchange traded futures contracts ('futures') are fair valued at the official exchange traded price at the close of business on the valuation day to approximate fair value. The fair value, less purchase price, represents the net unrealised gain or loss attributable to these open positions, and is included in the statement of financial position. The difference in the unrealised gain or loss between the current period and the prior year represents the net change in unrealised gain or loss and is included in the Statement of Comprehensive Income.

Margin Cash in relation to the futures is identified in the Schedules of Investments as Margin Cash and is included as a component of cash and cash equivalents on the Statement of Financial Position. As at 30 June 2022, Margin cash is held with the Bank of America Merrill Lynch International. As at 30 June 2022 Margin Cash is held with broker Bank of America Merrill Lynch International for Invesco EUR IG Corporate Bond ESG UCITS ETF, Invesco EUR Corporate Bond ESG Multi-Factor UCITS ETF and Invesco EUR Corporate Bond ESG Short Duration Multi-Factor UCITS ETF.

R) Withholding Tax

The Funds currently incurs withholding tax imposed by certain countries on investment income and capital gains. Such income or gains are reported gross of withholding tax and the withholding tax is shown separately in the Statement of Comprehensive Income.

S) Capital shares receivable/Capital shares payable

Capital shares receivable and Capital shares payable redeemed represent amounts that have been contracted for but not yet settled or delivered on the Statement of Financial Position date.

T) Securities Lending

A Fund may enter into securities lending agreements if consistent with the investment objective of the Fund and for the purposes of efficient portfolio management, including to generate income or profits in order to increase portfolio returns or to reduce portfolio expenses or risk, in accordance with the requirements and subject to any relevant regulations of the Central Bank. Any Fund that seeks to engage in securities lending should ensure that it is able at any time to recall any security that has been lent out or terminate any securities lending agreement into which it has entered. A Fund may engage in a securities lending programme through the Investment Manager. In order to mitigate the credit risk exposure to the counterparties to any securities lending contract, the lending of a Fund's securities must be covered by high quality and liquid collateral received by a Fund under a title transfer arrangement with a market value at all times at least equivalent to the market value of a Fund's securities lent plus a premium. A Fund's securities can be lent to counterparties over a period of time. The Manager will, at least annually, review and/or confirm the arrangements for securities lending and associated fees invoiced to the relevant Fund, if any. All the revenues arising from efficient portfolio management techniques shall be returned to the relevant Fund following the deduction of any direct and indirect operational costs and fees arising. Such direct and indirect operational costs and fees shall include fees and expenses payable to securities lending agents engaged by the Company. Details of the Funds' revenues arising and attendant direct and indirect operational costs and fees as well as the identity of any specific securities lending agents engaged by the Company are detailed in Note 13 Securities Lending and Collateral. Income earned from securities lending is reported as Securities lending income in the Statement of Comprehensive Income.

2. Fair value levels

IFRS 13 Fair Value Measurement requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities in the Statement of Financial Position. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs). The Funds have not invested in such instruments during the financial period.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The Funds consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The fair value of financial assets and liabilities traded in an active market (such as trading securities) are based on quoted market prices at the close of trading on the financial period-end date.

A financial instrument is regarded as quoted in an active market if the quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

In the event that market quotes are not readily available for either of these inputs the value of the relevant input will be determined in good faith by the Administrator or another independent service provider, generally based upon recommendations provided by the Investment Manager.

The carrying values of cash and cash equivalents, other receivables and payables are assumed to approximate their fair value.

As at 30 June 2022 and 31 December 2021 such financial assets include cash and cash equivalents, balances due from brokers, dividend income receivable, capital shares receivable, interest from financial assets at fair value through profit and loss receivable and accrued income and other receivables. The financial liabilities include bank overdraft, balances due to brokers, capital shares payable, variation margin payable and creditors (amounts falling due within one year). Level 2 is deemed to be the most appropriate categorisation for such assets and liabilities.

The Funds did not hold any Level 3 instruments during the financial period ended 30 June 2022 or financial year ended 31 December 2021.

There were no transfers between Level 1 and Level 2 during the financial period ended 30 June 2022 or financial year ended 31 December 2021.

Investments, whose values are based on quoted market prices in active markets and therefore classified within Level 1.

Notes to the Financial Statements (continued)

2. Fair value levels (continued)

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2.

The Schedule of investments shows the investments split by country of origin.

The following tables analyse within the fair value hierarchy the Funds' financial assets and liabilities (by class) measured at fair value. Amounts are stated in US Dollars, Euro and Sterling.

30 June 2022

4. Management fees

The Management Fee, a percentage of the Net Asset Value of the relevant Class of Shares, is payable by the Company out of the assets of the Funds to the Manager. The Management Fee accrued on each day and was calculated on each Dealing Day and paid monthly in arrears. The Manager paid out of its fees (and not out of the assets of the Funds) the fees and expenses (where appropriate) of the Investment Manager, the Administrator, the Depositary, the Directors, the Auditors and the ordinary fees, expenses and costs incurred by the Funds that include setting up costs and other administrative expenses as described in the Prospectus.

Notes to the Financial Statements (continued)

4. Management fees (continued)

The fees in the following table are expressed as a percentage per annum of the Funds' net asset value.

5. Related party transactions

Manager

The Company has appointed Invesco Investment Management Limited to act as Manager to the Company and each Fund. The Manager forms part of the Invesco group of companies, the parent of which is Invesco Limited, a US publicly traded company listed on the New York Stock Exchange with ticker IVZ.

Management fee charged during the period ended 30 June 2022 was EUR 9,269,101 (30 June 2021: EUR 7,075,175); of which EUR 1,542,054 was outstanding at 30 June 2022 (31 December 2021: EUR 1,654,916).

Directors

The amount paid to Directors in the financial period ended 30 June 2022 by the Manager and the amounts outstanding on 30 June 2022 are disclosed in Statement of Financial Position and Statement of Comprehensive Income on pages 270 to 311. The Directors who are also employees of the Invesco Group are not entitled to receive Directors' fees. Please see details above of fee paid to the Manager. Barry McGrath was a Director of the Company (up to the date of his resignation, 30 June 2022), the Manager and Invesco Holdings Limited. Gary Buxton is a Director of the Company and the Chief Operating Officer of the Promoter. Sarah (Katy Walton) Jones is Head of Legal for Invesco's EMEA ETP business and a director of Invesco Markets II plc. Feargal Dempsey is a Director of the Manager.

The Directors fees charged during the period ended was EUR 20,000 (inclusive of PAYE) (31 December 2021: EUR 40,000).

Investments in Short-Term Investment Funds

Details in relation to the Funds' Investment in short-term investment Funds please refer to "Investment Funds" in the Schedule of Investments on pages 34 to 269.

Investment Manager

Invesco Capital Management LLC is the Investment Manager to the Funds. The Funds paid no fees directly to the Investment Manager and all other expenses were paid by the Manager on behalf of the Funds.

Transaction with connected persons

Any transaction carried out with a UCITS by a management company or depositary to the UCITS, the delegates or sub-delegates of the management company or depositary, and any associated or group of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if conducted at arm's length. Transactions must be in the best interests of the Shareholders.

The Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 41(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons and are satisfied that transactions with connected persons entered into during the period complied with the obligations set out in Regulation 41(1) of the Central Bank UCITS Regulations.

Significant agreements

Authorised Participants

The complete list of Authorised Participants is shown in the General Information section on pages 8 and 9.

Brokerage fees were not paid to the Authorised Participants during the financial period ended 30 June 2022 (31 December 2021 : Nil).

Authorised Participants may purchase and hold Redeemable Shares in the Funds for trading purposes. In addition, the Authorised Participants may hold Redeemable Shares on behalf of clients, on their own account or for the purpose of providing seed capital to the Funds. These holdings may on occasion constitute a large portion of a Fund. From time to time, such holdings may even constitute the majority of assets under management of the Funds. There was no requirement (expressed or implied) on Authorised Participants to maintain positions in a Fund at any time.

Notes to the Financial Statements (continued)

6. Taxation

Under current law and practice, the Company qualifies as an investment undertaking as defined in section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a "chargeable event" for certain investors not satisfying one of the criteria outlined below.

A chargeable event includes any distribution payments to Shareholders or any encashment, redemption, cancellation or transfer of Shares and the holding of Shares at the end of each 8 year period beginning with the acquisition of such Shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- a) A Shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company, or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- b) Certain exempted Irish tax resident Shareholders who have provided the Company with the necessary signed statutory declarations.
- c) Any transaction (which might otherwise be a chargeable event) in relation to Shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners will not constitute a chargeable event. It is the current intention of the Directors that all the Shares in the Company will be held in recognised clearing systems.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders.

7. Share capital

The authorised share capital of the Company is 2 subscriber shares of €1 each and 1,000,000,000,000 shares of no par value initially designated as unclassified shares and available for issue as shares.

The Company strives to invest the subscriptions of Redeemable Shares in appropriate investments.

Details of the number of shares issued and redeemed during the financial period per Fund are contained overleaf:

Notes to the Financial Statements (continued)

8. Soft commission arrangements

It is not currently intended that any soft commission arrangements will be made in respect of the Company.

There were no soft commission arrangements in the current financial period (31 December 2021: none).

9. Segregation of liability

Under the provisions of the Companies Act 2014 (as amended), the Directors shall maintain for each Fund a separate portfolio of assets. As between Shareholders, each portfolio of assets shall be invested for the exclusive benefit of the relevant Fund. The Shareholders shall only be entitled to the assets and profits of that Fund in which they participate. The Company shall be considered one single legal entity. With regard to third parties, in particular towards the Company's creditors, the Company shall be responsible for all liabilities incurred by a Fund exclusively based on the assets of this relevant Fund. Among the Shareholders, the liabilities of each Fund shall only be incurred to the respective Fund.

While the provisions of the Companies Act 2014 (as amended) provide for segregated liability between Funds, these provisions have yet to be tested in foreign courts, in particular, in satisfying local creditors' claims. Accordingly, it is not free from doubt that the assets of any Fund of the Company may not be exposed to the liabilities of other Funds of the Company.

As at the date of the Financial Statements, the Directors are not aware of any existing or contingent liability of any Fund of the Company.

10. Operating Segment

IFRS 8 Operating Segments ("IFRS 8") requires a "management approach" under which segment information is presented on the same basis as that used for internal reporting purposes. The Board of Directors are charged with the overall governance of the Company in accordance with the Prospectus and Constitution. Management have determined the Chief Operating Decision Maker ("CODM") as the Board of Directors for the purposes of IFRS 8.

For Management purposes, the Company is organised into one main operating segment, which invests in equity instruments, debt instruments and related derivatives. All the Company's activities are interrelated and each activity is dependent on the others. Accordingly, all significant operating decisions are based upon analysis of the Company as one segment. The financial results from this segment are equivalent to the financial statements of the Company as a whole.

The Funds have no assets classified as non-current assets.

The Funds have highly diversified portfolios of investments and no single investment accounts for a significant portion of the Company's income.

Products and Services

As of the Company's revenues are derived from one product grouping, namely the portfolio securities and derivative instruments invested in by the Funds in order to track the performance of their respective indices.

Geographical areas

The Company does not separately monitor revenues from different geographical areas. However, by their nature of tracking indices which represent specific markets in specific regions, each Fund's revenue may be considered as being attributed to the region stated in its investment objective.

Major Customers

As the Company is an investment company, its distinct major customers are from institutional investors who make the primary market for the Funds' shares. The investments are allocated across 48 distinct Funds which each have a separate Schedule of Investments.

11. Transaction Costs

In order to achieve its investment objective, the Company incurs transaction costs in relation to trading activity on its portfolios.

The transaction costs below and overleaf were incurred by the Funds during the financial period ended 30 June 2022 and are included within the net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss figures in the Statement of Comprehensive Income:

12. Efficient Portfolio Management

The Company may, on behalf of each Fund and subject to the conditions and within the limits laid down, by the Central Bank of Ireland, employ techniques and instruments relating to transferable securities for efficient portfolio management purposes a list of which are set out in the relevant Supplement for each Fund. Transactions for the purposes of efficient portfolio management maybe undertaken with a view to achieving a reduction in risk, a reduction in costs or the generation of additional capital or income for the relevant Fund with an appropriate level of risk, taking into account the risk profile of the Funds as described in this Prospectus and the relevant Supplement and the risk diversification rules set out in the Central Bank Regulations. Subject to the Regulations and to the conditions within the limits laid down by the Central Bank, the Company, on behalf of a Fund may invest in FDIs dealt on a regulated market and/or OTCs which will be used for investment purposes, hedging and/or efficient portfolio management purposes.

The FDIs in which a Fund may invest are spot and forward currency contracts, options on securities, indices and currencies, Swaps, credit default swaps, futures and options on futures and when issued and forward commitment securities further details of which will be set out in the relevant Supplement. Such techniques and instruments will be utilised in accordance with the requirements of the Central Bank of Ireland. New techniques and instruments may be developed which may be suitable for use by the Company and the Company (subject as aforesaid) may employ such techniques and instruments.

The Funds may also enter into securities lending for the purpose of efficient portfolio management and this may reduce the Minimum Equity Ratio of the Funds. However, the qualifying Fund will ensure that they maintain a minimum continuous investment of more than 50% of their net asset value into equities.

For UCITS which have engaged in EPM techniques, certain disclosures are required under Chapter 4 of the Central Bank UCITS Regulations. The Investment Advisers of the Funds have identified all Financial Derivative Instruments (FDIs) which are used for EPM. A UCITS is required to disclose the revenues arising from EPM techniques for the entire reporting period together with the direct and indirect operational costs and fees incurred.

Details of forward foreign exchange contracts are reflected within the Schedule of Investments of each fund where held.

Notes to the Financial Statements (continued)

13. Securities Lending and Collateral

A Fund may enter into securities lending, repurchase and/or reverse repurchase agreements if consistent with the investment objective of the Funds and for the purposes of efficient portfolio management, including to generate income or profits in order to increase portfolio returns or to reduce portfolio expenses or risk, in accordance with the requirements and subject to any relevant regulations of the Central Bank. The maximum proportion of a Fund's assets that may be subject to securities lending is 100% and the expected proportion of a Fund's assets that may be subject to securities lending are between 0% and 15% for Equity Funds and between 0% and 30% for Bond Funds.

The securities lending agent appointed pursuant to the Securities Lending Authorisation Deed is The Bank of New York Mellon SA/NV ("Bank").

At 30 June 2022, there was securities lending on Funds listed in the tables below. These tables show the securities lending income earned. This securities lending income earned is net of the lending agent fee.

As per the Securities Lending Authorisation Deed, the Bank is authorised and directed to invest and re-invest all or substantially all of the collateral received in any approved investments as specified to be "No Cash Collateral other than for the purposes set out in Schedule 1" of the in the Securities Lending Authorisation Deed. All approved investments shall be for the account and risk of the lender. To the extent any loss arising out of approved investments results in a deficiency in the amount of collateral available to return to a borrower, the lender agrees to pay the Bank on demand cash in amount equal to such deficiency. As at 30 June 2022, there was no collateral re-invested.

As at 30 June 2022 and 31 December 2021, there was no cash collateral held by the Funds.

The amount of collateral obtained under a securities lending arrangement must be of at least 100% of the daily marked to market value of the stocks on loan.

As per the Securities Lending Authorisation Deed, the non-cash collateral can consist of Debt obligations and securities issued by a government where such government is a ratified member of the Organization for Economic Co Operation and Development, or by the government of Singapore.

The value of securities on loan by counterparty and the value and type of collateral held by the Company in respect of those securities as at 30 June 2022 are detailed overleaf:

Notes to the Financial Statements (continued)

16. Significant events during the financial period (continued)

Russia-Ukraine Conflict

Due to the current market disruption created by the Russian-Ukraine conflict and deteriorating tradability of Russian shares, no funds, other than the Invesco Emerging Markets USD Bond UCITS ETF and Invesco MSCI Emerging Markets ESG Universal Screened UCITS ETF UCITS ETF, had a material exposure to the Company as a whole. The Directors are actively monitoring the situation and will continue to review during this period of uncertainty.

There were no other significant events during the financial period ended 30 June 2022.

17. Significant events since the financial period end

Invesco Quantitative Strategies Global Equity Low Volatility Low Carbon UCITS ETF launched on 19 July 2022.

Effective 1 August 2022, Lisa Martensson (Swedish) appointed as a Director of the Company.

Effective 3 August 2022, there was a management fee change on the Invesco Quantitative Strategies ESG Global Equity Multi-Factor UCITS ETF from 0.60% to 0.30% per annum.

There were no other significant events since the financial period end.

18. Approval of Financial Statements

The Financial Statements were authorised by the Board on 16 August 2022.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

*Effective 2 May 2022, the Fund name changed from Invesco Euro Corporate Bond UCITS ETF to Invesco EUR IG Corporate Bond ESG UCITS ETF.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

**Statement of Changes in Composition of Portfolio (Unaudited)
for the financial period ended 30 June 2022**

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

**Statement of Changes in Composition of Portfolio (Unaudited)
for the financial period ended 30 June 2022**

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

* Fund launched on the 13 June 2022..

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

**Statement of Changes in Composition of Portfolio (Unaudited)
for the financial period ended 30 June 2022**

Appendix 1

Securities Financing Transactions Regulation

Securities lending

All securities lending transactions entered into by the Funds are subject to a written legal agreement between the Funds and the Securities Lending Agent, The Bank of New York Mellon SA/NV, a related party to the Company, and separately between the Securities Lending Agent and the approved borrowing counterparty.

The following table details the aggregate value of securities on loan by Fund as a proportion of total lendable assets and each Fund's NAV as at 30 June 2022:

Fund	Currency	Aggregate value of securities on loan	% of Total lendable assets	% of NAV
Invesco Preferred Shares UCITS ETF	USD	64,553	0.03	0.03

Appendix 1

Securities Financing Transactions Regulation (continued)

The collaterals are held in the name of the Lending Agent Lender to the order of its clients; the actual segregation to underlying client level is done with the Lending Agent's books and records. The collaterals are held on account at the tri-party agent, who acts as a settlement and collection service for securities and collateral between the lender and the borrower. The tri-party agents used but not limited to, The Bank of New York Mellon, London Branch, JPMorgan Chase Bank N.A and Euroclear Bank. For bilateral transactions, the collaterals are held on account at the Agent Lender.

The following tables provide an analysis of the amounts held at each collateral agent as non-cash collateral received in respect of securities lending transactions as at 30 June 2022:

Appendix 1

Securities Financing Transactions Regulation (continued)

The type and quality of collateral obtained in respect of securities lending transactions are as follows:

(1) Debt obligations and securities issued by a government where such government is a ratified member of the Organization for Economic Co-Operation and Development, or by the government of Singapore. Debt obligations and securities issued by agencies and instrumentalities of these same governments are also acceptable. In each case, the issuer of the debt obligation or security shall be rated (i) A or better by Standard & Poor's, or (ii) A or better by Fitch, or (iii) A2 or better by Moody's, or (iv) A or better by DBRS.

(2) Debt obligations issued by the following supranational issuers, where such issuer has a rating of (i) AA or better by Standard & Poor's, or (ii) AA or better by Fitch, or (iii) Aa2 or better by Moody's, or (iv) AA or better by DBRS.**: European Bank for Reconstruction and Development; European Investment Bank; European Union; European Stability Mechanism, Inter-American Development Bank; International Bank for Reconstruction and Development; International Finance Corporation; European Financial Stability Facility; Eurofima; Council of Europe Development Bank; Eutelsat; Organisation for Economic Co-operation and Development; African Development Bank; Asian Development Bank; Bank of International Settlements; Euratom; European Coal and Steel Community; International Development Association; International Monetary Fund; Nordic Investment Bank;

(3) equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America);

(4) FTSE100 DBV (Class F10) as defined in the Crest Reference Manual; and

(5) unstripped British Government Stock (Class UBG) as defined in the CREST Reference Manual.

The following tables provide an analysis of the type and quality of non-cash collateral received in respect of securities lending transactions as at 30 June 2022:
