Investment objective

The objective of the Fund is to seek to achieve a total return by investing in (i) an underlying fund that pursues a total return with a low to moderate correlation to traditional financial market indices, and (ii) an underlying fund that seeks to achieve a positive absolute return over a complete economic and market cycle, and provide capital loss protection during down markets, by investing primarily in derivatives and other financially-linked instruments whose performance is expected to correspond to U.S. and international fixed income, equity and commodity markets.

Investor profile

The Fund may be appropriate for investors seeking diversified exposure to a blend of investments across all asset classes, geographies, sectors, and currencies via direct holdings in two underlying alternative strategies funds.

Gross performance has been calculated before the deduction of investment management and client service fees, but after the deduction of all other expenses applicable to the unit class. Net performance has been calculated after the deduction of all fees and expenses applicable to the unit class as well as a hypothetical management fee of 0.49%.

Total return assumes reinvestment of dividends and capital gains for the periods indicated. Past performance is no guarantee of future results. Investment return and principal value will vary and you may have a gain or loss when you sell shares. Returns less than one year are cumulative; all others are annualized.

Annualized fees and expenses

Management Fee	N/A
Annual Fund Operating Expenses	0.09%
Acquired Fund Expenses*	0.01%
Total Annual Expense Ratio*	0.10%

The investment management fee, which may include client service fees, varies for each Plan based on the fee negotiated with the Plan. This negotiated fee can fluctuate daily based on the various asset level break-points reached at the time the daily fee accrual is calculated for each Plan. Therefore, management fees and optional client service fees are not reflected in fact sheets.

Contact your Plan Sponsor to find out the management fee schedule in effect for your retirement plan.

Fund Operating Expenses are unaudited and subject to change. Operating expenses are borne directly by the fund for operation and administration.

**Acquired Fund Expenses are fees borne indirectly by the fund when it invests in other funds which incur their own fees and expenses including management fees to affiliated or unaffiliated sub advisers. Acquired Fund Expenses are unaudited and subject to change.*

Word about risk

Some of the principal risks associated with investing in this Fund include:

The Fund is subject to the risks of the underlying funds. Market fluctuations may change the target weightings in the underlying funds and certain factors may cause the Fund to withdraw its investments therein at a disadvantageous time.

Commodities may subject an investor to greater volatility than traditional securities such as stocks and bonds and can fluctuate significantly based on weather, political, tax, and other regulatory and market developments.

Should the Fund's asset classes or the selected countries and investments become correlated in a way not anticipated by the Adviser, the risk allocation process may result in magnified risks and loss instead of balancing (reducing) the risk of loss.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Issuers of foreign government debt or the governmental authorities that control repayment may be unable or unwilling to repay principal or interest when due, and the Fund may have limited recourse in the event of default. Without debt holder approval, some governmental debtors may be able to reschedule or restructure their debt payments or declare moratoria on payments.

Obligations issued by US Government agencies and instrumentalities may receive varying levels of support from the government, which could affect the fund's ability to recover should they default.

Underlying investments may appreciate or decrease significantly in value over short periods of time and cause share values to experience significant volatility over short periods of time.

The Fund will incur a loss on a short position, which is theoretically unlimited, if the price of the asset sold short increases from the short sale price. In a rising market, short positions will cause the Fund to underperform the overall market and its peers that do not engage in shorting. In a market where the value of both the long and short positions are declining, the Fund may experience substantial losses. Some short positions involve leverage, which may exaggerate losses, more than the cost of the investment, thus increasing the Fund's volatility of returns.

The Fund is subject to certain other risks. Please see the Declaration of Trust for more information
